MES/AY-HOS-AF – Messengers – Hose (Astern Fueling)

SKU: MES/AY-HOS-AF

Description

- The hose messenger assembly consists of a 310 foot nylon messenger assembly, grapnel, and float and pendant assembly. It is used to tow the messenger buoy behind the astern fueling hose rig when the rig is deployed behind the delivery ship, providing a visual indicator of the hose rig location. It is also used to haul the messenger bridle and hose onboard the receiving ship.
